Journal of Cellular Plastics

Subject and Title Index *Vol. 7 / 1971*

ABS Foam
Structural Foam ABS, *Nov./Dec., p. 309*

Ammonia
Metal Ammine Complexes: A New Class of Flame Retardants, *July/Aug., p. 202*

Analysis
Qualitative and Quantitative Analyses of Isocyanurate-Containing Foams by Thermal Techniques, *May/June, p. 135*

Appliances, Markets
Cellular Plastics in Home Furnishings, *Nov./Dec., p. 319*

Blowing Agent
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*

Building and Construction
Fire Performance Data for Urethane Cellular Plastics, *Sept./Oct., p. 241*

Carbon Foam
Preparation and Properties of Carbon Foam, *Nov. /Dec., p. 294*

Carpeting, Markets
Cellular Plastics in Home Furnishings, *Nov./Dec., p. 319*

Catalysts
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*
Effects of Amine Catalysts on the Physical Properties of a Rigid Urethane Foam System, *July/Aug., p. 195*

Cell Stabilizer
FS-100-A Cell Stabilizer for PVC Foam, *May/June, p. 128*

Cellular Plastics
Compression of Cellular Plastics at High Strain Rates, *Mar./Apr., p. 97*

Chair Shells
Structural Foam ABS, *Nov./Dec., p. 309*

Combustion
Physical Aspects of the Flammability Evaluation of Polymers, *July/Aug., p. 181*

Composite Foams
Impact Energy Absorption by Foamed Polymers, *Mar./Apr., p. 78*

Compression Behavior
Impact Energy Absorption by Foamed Polymers, *Mar./Apr., p. 78*
Compression of Cellular Plastics at High Strain Rates, *Mar./Apr., p. 97*

Compression Set
The Compression Set of Molded Flexible, Urethane Foams, *Sept./Oct., p. 229*

Compressive Strength
Effects of Amine Catalysts on the Physical Properties of a Rigid Urethane Foam System, *July/Aug., p. 195*

Cores, Urethane
The Impact Resistance of Plastics Sandwich Constructions Using Low Density Urethane Foam Cores, *Nov./Dec., p. 313*

Creep
The Compression Set of Molded Flexible, Urethane Foams, *Sept./Oct., p. 229*

Cushioning
Observations on the Impact Behaviour of Polyurethane Foams; I. The Polymer Matrix, *Jan./Feb., p. 33*
Cushioning and Load Distribution Performance of Plastic Foams, *Mar./Apr., p. 72*
Observations on the Impact Behaviour of Polyurethane Foams; II. The Effect of Fluid Flow, *Mar./Apr., p. 84*

Damping
Impact Energy Absorption by Foamed Polymers, *Mar./Apr., p. 78*

Development
Use of Foamed-in-Place Epoxy Resins in Aircraft Composite Structures, *May/June, p. 140*

Differential Thermal Analysis
Qualitative and Quantitative Analyses of Isocyanurate-Containing Foams by Thermal Techniques, *May/June, p. 135*

Dynamic Stress and Strain
Observations on the Impact Behaviour of Polyurethane Foams; I. The Polymer Matrix, *Jan./Feb., p. 33*

Editorials
On Committees, *Jan./Feb., p. 5*
IdeaMart '71, *Mar./Apr., p. 57*
Dues, Do's and Don'ts, *May/June, p. 109*
A Non-editorial, *July/Aug., p. 161*
On Technical Conferences, *Sept./Oct., p. 213*
On Deadbeats, *Nov./Dec., p. 277*

Energy Absorption
Observations on the Impact Behaviour of Polyurethane Foams; I. The Polymer Matrix, *p. 33*
Impact Energy Absorption by Foamed Polymers, *Mar./Apr., p. 78*
Observations on the Impact Behaviour of Polyurethane Foams; II. The Effect of Fluid Flow, *Mar./Apr., p. 84*

Energy Attenuation
Cushioning and Load Distribution Performance of Plastic Foams, *Mar./Apr., p. 72*

Epoxy Foam
Use of Foamed-in-Place Epoxy Resins in Aircraft Composite Structures, *May/June, p. 140*

Expansion Coating
Structural Foam ABS, *Nov./Dec., p. 309*

Fire Retardants
Fire Performance Data for Urethane Cellular Plastics, *Sept./Oct., p. 241*

Flame Retardants
Metal Ammine Complexes: A New Class of Flame Retardants, *July/Aug., p. 202*

XUM

Flammability
Physical Aspects of the Flammability Evaluation of Polymers, *July/Aug., p. 181*
An Evaluation of the Safety Standard No. 302 for Flammability of Motor Vehicle Interior Materials, *Sept./Oct., p. 265*

Flammable Limits
Physical Aspects of the Flammability Evaluation of Polymers, *July/Aug., p. 181*

Flooring, Markets
Cellular Plastics in Home Furnishings, *Nov./Dec., p. 319*

Fluid Flow
Observations on the Impact Behaviour of Polyurethane Foams; II. The Effect of Fluid Flow, *Mar./Apr., p. 84*

Foam Laminates
Hot Melt Flow Properties of Vinyl Plastisols for Chemically Blown Flow Laminates, *Jan./Feb., p. 23*

Foam Molding
Structural Foam ABS, *Nov./Dec., p. 309*

Foamed Polymers
Impact Energy Absorption by Foamed Polymers, *Mar./Apr., p. 78*

Foams
Thermal Properties of Lactone Ester Based Rigid Urethane Foam, *May/June, p. 146*

Formulation
Use of Foamed-in-Place Epoxy Resins in Aircraft Composite Structures, *May/June, p. 140*

Fuel Fire Test
Development and Evaluation of Modified Polyisocyanurate Foams for Low-Heating-Rate Thermal Protection, *Mar./Apr., p. 91*

Furniture Foams
Cellular Plastics in Home Furnishings, *Nov./Dec., p. 319*

Government Standard
An Evaluation of the Safety Standard No. 302 Test for Flammability of Motor Vehicle Interior Materials, *Sept./Oct., p. 265*

Heat Transfer
Physical Aspects of the Flammability Evaluation of Polymers, *July/Aug., p. 181*

Hexamminocobaltic Chloride
Metal Ammine Complexes: A New Class of Flame Retardants, *July/Aug., p. 202*

High Strain Rates
Compression of Cellular Plastics at High Strain Rates, *Mar./Apr., p. 97*

Hot Melt Properties
Hot Melt Flow Properties of Vinyl Plastisols for Chemically Blown Flow Laminates, *Jan./Feb., p. 23*

Human Faceform
Cushioning and Load Distribution Performance of Plastic Foams, *Mar./Apr., p. 72*

Human Headform
Cushioning and Load Distribution Performance of Plastic Foams, *Mar./Apr., p. 72*

Impact Properties
Impact Energy Absorption by Foamed Polymers, *Mar./Apr., p. 78*

Impact Study
Observations on the Impact Behaviour of Polyurethane Foams; I. The Polymer Matrix, *Jan./Feb., p. 33*
Cushioning and Load Distribution Performance of Plastic Foams, *Mar./Apr., p. 72*
Observations on the Impact Behaviour of Polyurethane Foams; II. The Effect of Fluid Flow, *Mar./Apr., p. 84*

Indentation
Mechanical Properties of Plastic Foams. II. The Modulus of Elasticity and Indentation of Bead-Type Foams, *Nov./Dec., p. 302*

Instrumental
Thermal Properties of Lactone Ester Based Rigid Urethane Foam, *May/June, p. 146*

Integral Skin Foams
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*

Isocyanates
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*

Isocyanurate-Containing Foams
Qualitative and Quantitative Analyses of Isocyanurate-Containing Foams by Thermal Techniques, *May/June, p. 135*

Load Distribution Performance
Cushioning and Load Distribution Performance of Plastic Foams, *Mar./Apr., p. 72*

Markets, Furniture
Cellular Plastics in Home Furnishings, *Nov./Dec., p. 319*

Mechanical Properties
Properties of Structural Foams, *July/Aug., p. 189*
Mechanical Properties of Plastic Foams. II. The Modulus of Elasticity and Indentation of Bead-Type Foams, *Nov./Dec., p. 302*

Metal Ammine Complexes
Metal Ammine Complexes: A New Class of Flame Retardants, *July/Aug., p. 202*

Modulus of Elasticity
Mechanical Properties of Plastic Foams. II. The Modulus of Elasticity and Indentation of Bead-Type Foams, *Nov./Dec., p. 302*

Molded Bead Foam
Mechanical Properties of Plastic Foams. II. The Modulus of Elasticity and Indentation of Bead-Type Foams, *Nov./Dec., p. 302*

Molding Conditions
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*

Motor Vehicles
An Evaluation of the Safety Standard No. 302 Test for Flammability of Motor Vehicle Interior Materials, *Sept./Oct., p. 265*

Picture Frames
Structural Foam ABS, *Nov./Dec., p. 309*

Plastic Foams
Cushioning and Load Distribution Performance of Plastic Foams, *Mar./Apr. p. 72*

Polyethers
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*

Polyisocyanurate Foams
Development and Evaluation of Modified Polyisocyanurate Foams for Low-Heating-Rate Thermal Protection, *Mar./Apr., p. 91*

Polymers
Physical Aspects of the Flammability Evaluation of Polymers, *July/Aug., p. 181*

Polyurethanes
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*
Observations on the Impact Behaviour of Polyurethane Foams; I. The Polymer Matrix, *Jan./Feb., p. 33*
Observations on the Impact Behaviour of Polyurethane Foams; II. The Effect of Fluid Flow, *Mar./Apr., p. 84*

PVC Foam
Hot Melt Flow Properties of Vinyl Plastisols for Chemically Blown Flow Laminates, *Jan./Feb., p. 23*
FS-100-A Cell Stabilizer for PVC Foam, *May/June, p. 128*

Pyrolysis Products
Physical Aspects of the Flammability Evaluation of Polymers, *July/Aug., p. 181*

Quick-Strip Urethanes
Room Temperature Cure Semi-Rigid Foams for Molded Parts Based on Hylene® TRF, *Jan./Feb., p. 43*

Reactivity
Effects of Amine Catalysts on the Physical Properties of a Rigid Urethane Foam System, *July/Aug., p. 195*

Reinforcement
Use of Foamed-in-Place Epoxy Resins in Aircraft Composite Structures, *May/June, p. 140*

Repair
Use of Faomed-in-Place Epoxy Resins In Aircraft Composite Structures, *May/June, p. 140*

Rigid Foams
Properties of Structural Foams, *July/Aug., p. 189*

Sandwich Panels, Impact Strength
The Impact Resistance of Plastics Sandwich Constructions Using Low Density Urethane Foam Cores, *Nov./Dec., p. 313*

Semi-Rigid Urethanes
Room Temperature Cure Semi-Rigid Foams for Molded Parts Based on Hylene® TRF, *Jan./Feb., p. 43*

Smoke Density
Fire Performance Data for Urethane Cellular Plastics, *Sept./Oct., p. 241*

Stress Relaxation
The Compression Set of Molded Flexible, Urethane Foams, *Sept./Oct., p. 229*

Structural Foam
Use of Foamed-in-Place Epoxy Resins in Aircraft Composite Structures, *May/June, p. 140*
Preparation and Properties of Carbon Foam, *Nov./Dec., p. 294*
Structural Foam ABS, *Nov./Dec., p. 309*

Surface Flame Spread
An Evaluation of the Safety Standard No. 302 Test for Flammability of Motor Vehicle Interior Materials, *Sept./Oct., p. 265*

Testing
Thermal Properties of Lactone Ester Based Rigid Urethane Foam, *May/June, p. 146*

Thanol® C-150
Integral Skin Foams Based on Polymeric Isocyanates, *Jan./Feb., p. 16*

Thermal Degradation
Metal Ammine Complexes: A New Class of Flame Retardants, *July/Aug., p. 202*

Thermal Gravimetric Analysis
Qualitative and Quantitative Analyses of Isocyanurate-Containing Foams by Thermal Techniques, *May/June, p. 135*

Thermal Stability
Thermal Properties of Lactone Ester Based Rigid Urethane Foam, *May/June, p. 146*

Thermal Techniques
Qualitative and Quantitative Analyses of Isocyanurate-Containing Foams by Thermal Techniques, *May/June, p. 135*

Thermally Thick Materials
Physical Aspects of the Flammability Evaluation of Polymers, *July/Aug., p. 181*

Upholstery, Markets
Cellular Plastics in Home Furnishings, *Nov./Dec., p. 319*

Urethanes
Properties of Structural Foams, *July/Aug., p. 189*
Effects of Amine Catalysts on the Physical Properties of a Rigid Urethane Foam System, *July/Aug., p. 195*

Urethanes, Flexible
Metal Ammine Complexes: A New Class of Flame Retardants, *July/Aug., p. 202*
The Compression Set of Molded Flexible, Urethane Foams, *Sept./Oct., p. 229*
Fire Performance Data for Urethane Cellular Plastics, *Sept./Oct., p. 241*
An Evaluation of the Safety Standard No. 302 Test for Flammability of Motor Vehicle Interior Materials, *Sept./Oct., p. 265*

Urethanes, Japanese Markets
Recent Development in the Urethane Foam Industry in Japan, *July/Aug., p. 174*

Urethanes, Markets
Urethanes in the Seventies, *May/June, p. 110*

Urethanes, Rigid
Fire Performance Data for Urethane Cellular Plastics, *Sept./Oct., p. 241*
